Regional Flood Management and Mitigation Centre

Weekly Dry Season Situation Report for the Mekong River Basin

Prepared at: 19/01/2015, covering the week from the 12th to the 19th January 2015

Weather Patterns, General Behaviour of the Mekong River and Dry Season Situation

General weather patterns:

No critical weather during the last week

General behaviour of the Mekong River:

Compared to the long term average (LTA) the water levels at Chiang Saen to Kratie, Tan Chau and Chau Doc were fluctuated above the LTA, the rest were fluctuated below the LTA, except Neak Luong that was just about the LTA at the end of the week.

For stations from Chiang Saen and Luang Prabang

Compared to long term average (LTA), during last week the water level at these stations were fluctuated above the LTA.

For stations from Chiang Khan, Vientiane and Nong Khai and Paksane

Compared to long term average (LTA), during last week the water level at these stations were fluctuated above the LTA.

For stations from Nakhon Phanom to Pakse

Compared to long term average (LTA), during last week the water level at these stations were fluctuation above the LTA.

For stations from Stung Treng to Kompong Cham

Compared to long term average (LTA), during last week the water level at these stations were fluctuating above the LTA, except Kompong Cham that was fluctuating below the LTA.

For stations from Phnom Penh to Prek Kdam

Compared to long term average (LTA), during last week the water level at these stations were fluctuating below the LTA.

Tan Chau and Chau Doc

Compared to long term average (LTA), during last week the water level at Tan Chau was fluctuating above the LTA while Chau Doc was fluctuating about the LTA.

Dry season situation

In general, the measurement's water levels at all forecast stations of the Mekong River during the last week were normal condition. There were some minor rainfalls of at upper reach of the LMB. (See Annex A).

For more details see the following annex:

- Tables for observed water level and rainfall for the last week in Annex A
- The water level graphs showing the observed water level for the season in Annex B
