## Regional Flood Management and Mitigation Centre

### Weekly Dry Season Situation Report for the Mekong River Basin

Prepared at: 12/02/2019, covering the week from the 05<sup>th</sup> to 11<sup>th</sup> February 2019.

### Weather Patterns, General Behaviors of the Mekong River and Dry Season Situation

#### General weather patterns:

No critical weather situation over the Lower Mekong Basin, during this week. During the last week, the water levels at stations from upper to middle part of LMB has been fluctuated above their long-term averages (LTAs) due to inflow operation upstream part, while at downstream part has been decreased significantly.

#### General behavior of the Mekong River:

From 11<sup>th</sup> to 18<sup>th</sup> February 2019, water levels along the lower Mekong River from Thailand's Chiang Saen to Lao PDR's Luang Prabang will be fluctuating above their long-term averages (LTAs) the same as last week. The trend will be the same for the stations from Lao PDR's Vientiane to Cambodia's Kratie. The lower reaches from Cambodia's Phnom Penh at Chaktomuk to Viet Nam's Tan Chau on the Mekong River and Chau Doc on the Bassac River will experience fluctuated below their LTAs.

#### ***For stations from Chiang Saen and Luang Prabang***

Water levels from 05<sup>th</sup> to 11<sup>th</sup> February 2019 at Chiang Saen and Luang Prabang stations were stayed above their long-term averages (LTAs).

#### ***For stations from Chiang Khan, Vientiane-Nong Khai and Paksane***

Water levels from 05<sup>th</sup> to 11<sup>th</sup> February 2019 at Chiang Khan, Vientiane, Nong Khai and Paksane were fluctuated above the LTAs.

#### ***For stations from Nakhon Phanom to Pakse***

Water levels from 05<sup>th</sup> to 11<sup>th</sup> February 2019 at Nakhon Phanom to Pakse were also increased slightly above their LTAs.

#### ***For stations from Stung Treng to Kratie***

Water levels from 05<sup>th</sup> to 11<sup>th</sup> February 2019 at Stung Treng to Kratie were also increased slightly above their LTAs.

#### ***For stations from Kompong Cham, Phnom Penh to Prek Kdam***

Water levels from 05<sup>th</sup> to 11<sup>th</sup> February 2019 at Kompong Cham down to Chaktomuk and Prekdam on the Tonle Sap were stayed below their long-term averages (LTAs).

#### ***Tan Chau and Chau Doc***

Water levels from 05<sup>th</sup> to 11<sup>th</sup> February 2019 at Tan Chau on the Mekong and at Chau Doc on the Bassac were fluctuated below their long-term averages (LTAs).

#### Dry season situation

Compared to the Long-Term Averages (LTAs), water levels at stations from Chiang Saen to Kratie of the Mekong River were fluctuating above their LTAs, except from Kompong Cham to Tan Chau and Chau Doc water levels were fluctuating below their LTAs.

For details information on water levels and rainfall at each key station are described as follows:

- Tables for observed water levels and rainfall for the last week in Annex A
- The water levels graphs showing the observed water levels for the season in Annex B

**Annex A: Graphs and Tables**
