Regional Flood Management and Mitigation Centre

Weekly Dry Season Situation Report for the Mekong River Basin

Prepared at: 14/11/2016, covering the week from the 07th to 14th November 2016.

Weather Patterns, General Behaviour of the Mekong River and Dry Season Situation

General weather patterns:

No critical weather during last week

General behaviour of the Mekong River:

Compared to the Long-Term Average (LTA), the water levels at stations along the mainstream Mekong River from Chiang Saen to Kratie were fluctuating and slight increased above or about the LTA, the rest were fluctuating below the LTA.

For stations from Chiang Saen and Luang Prabang

Compared to long term average (LTA), during last week the water levels at these stations rose above the LTA.

For stations from Chiang Khan, Vientiane and Nong Khai and Paksane

Compared to long term average (LTA), during last week the water levels at these stations rose above the LTA.

For stations from Nakhon Phanom to Pakse

Compared to long term average (LTA), during last week the water levels at these stations rose above the LTA.

For stations from Stung Treng to Kompong Cham

Compared to long term average (LTA), during last week the water levels at these stations recessed above the LTA except Kompong Cham that was below the LTA.

For stations from Phnom Penh to Prek Kdam

Compared to long term average (LTA), during last week the water levels at these stations were fluctuated below the LTA.

Tan Chau and Chau Doc

Compared to long term average (LTA), during last week the water levels at these stations were fluctuating below the LTA.

Dry season situation

During last week, all water levels in the LMB recessed below the long term average (LTA), except Chiang Saen to Kratie that rose about/above the LTA. Heavy rainfalls happened in the lower part of LMB, and the accumulated weekly rainfall about or greater than 100 mm happened at Stung Treng (101 mm.), Koh Khel (172.9 mm.) and Tan Chau (112.1 mm.), (see Table A2).

For more details see the following annexes:

- Tables for observed water levels and rainfall for the last week in Annex A
- The water levels graphs showing the observed water levels for the season in Annex B

Annex A: Graphs and Tables
